Professional Summary

Third-year B.Sc. (Hons) Information Technology undergraduate at the University of Moratuwa with a 3.95/4.00 CGPA and hands-on experience building full-stack, real-time, cloud-connected, and embedded systems. Owned a full-stack seller module in an industry project, developed a deployed academic analytics platform, and built an ESP32/Arduino motion-control system. Seeking a software engineering internship to contribute across frontend and backend development while continuing to grow in AI-enabled systems.

Education

B.Sc. (Hons) in Information Technology

University of Moratuwa, Faculty of Information Technology

2024 - Present

CGPA: 3.95 / 4.00

GCE Advanced Level

St. Anne's College, Kurunegala

Physics A; Combined Mathematics B; Chemistry B; Z-score: 1.6692

2022

Technical Skills

Languages	TypeScript, JavaScript, Python, Java, C, PHP
Frontend	Next.js, React, Tailwind CSS, HTML5, CSS3, Recharts
Backend & APIs	FastAPI, Node.js, REST APIs, WebSockets, Supabase Edge Functions
Databases	MSSQL, PostgreSQL, MySQL, MongoDB, Firebase, Supabase
Cloud	AWS (EC2, S3, CloudFront), Vercel
Tools	Git, GitHub, Linux
Embedded	Arduino Uno, ESP32, GRBL, CoreXY motion systems

Selected Projects

TeaBlendAI - AI-Powered Tea Auction Platform

Industry Project with Inivos Technology | Next.js, TypeScript, FastAPI, MSSQL, REST APIs, WebSockets | GitHub

Dec 2025 - Jun 2026

- Owned the full-stack Seller Module in a five-member team, developing seller dashboards and workflows to create, schedule, monitor, and manage live, scheduled, and completed tea auctions.
- Built responsive multi-step auction forms with validation and image previews, and integrated the frontend with backend REST APIs and MSSQL persistence.
- Built the real-time buyer-seller messaging system using WebSockets and supported role-based access and live auction updates across the platform.

GPA Vault - Academic Performance Tracker

React, Vite, Supabase, PostgreSQL, Recharts, Gemini API | Live Site

Aug 2026 - Present

- Built and deployed an academic tracker supporting multiple grading scales, semester and course management, real-time CGPA calculations, and CSV export.
- Developed an analytics dashboard with GPA trends, credit-load and grade-distribution charts, what-if planning, and target-GPA forecasting.
- Implemented Google OAuth, PostgreSQL cloud synchronization with row-level security, and Gemini-powered transcript image extraction through a server-side Supabase Edge Function.

SandPlotter Smart Coffee Table

Arduino Uno, ESP32, C++, GRBL, CoreXY, TFT Touch Display, WebSockets

Aug 2024 - Aug 2025

- Designed and built a CoreXY sand-art system using NEMA 17 motors, A4988 drivers, limit switches, and GRBL to draw patterns and custom text with a magnet-driven steel ball.
- Implemented an ESP32 bridge that streamed G-code line by line to the Arduino Uno from TFT touch and web interfaces using acknowledgement-based flow control.
- Added remote pattern selection and real-time progress updates, integrating embedded control, Wi-Fi communication, motion calibration, homing, and physical system debugging.

Selected Projects - Continued

ICITR 2026 Conference Website - Web Development Team Member

Jun 2026 - Present

Next.js, TypeScript, Tailwind CSS, GitHub

- Contributing to the official website for the 11th International Conference on Information Technology Research, organized by the Information Technology Research Unit at the University of Moratuwa.
- Developing responsive pages for conference information, six technical tracks, speakers, workshops, author guidelines, proceedings, and announcements through a collaborative GitHub workflow.

Farmify - Agricultural Support Platform

Jun 2024 - Aug 2024

IDEALIZE 2024 Team Project | React, JavaScript, Firebase

- Developed for IDEALIZE 2024, organized by AIESEC in University of Moratuwa, as a platform connecting farmers with agricultural experts and improving access to agricultural guidance.
- Contributed to authentication, product listings, responsive interfaces, and real-time Firebase data updates in a collaborative team environment.

Achievements

2nd Runner-up - Medusa 2.0 National Cybersecurity CTF

2025

ECSC, University of Kelaniya. Collaborated under time constraints to identify and exploit web application vulnerabilities in a national-level competition.

4th Place - VECTRA Attack-and-Defence CTF

2026

IEEE WIE, Informatics Institute of Technology. Competed in an attack-and-defence format involving service exploitation and protection across web security, reverse engineering, and cryptography challenges.

9th Place - SHERlock 2.0

2026

IEEE WIE, Informatics Institute of Technology. Completed a STEM-based forensic investigation involving evidence analysis, clue discovery, and logical problem-solving.

Semi-Finalist - SPARK Challenge

2026

ENTC, University of Moratuwa. Advanced to the semi-final stage of the university innovation project competition.

Leadership & Volunteering

IT and Web Committee Lead, SEDS Mora Chapter

2026 - Present

University of Moratuwa

2026/27 Term

- Leading the committee responsible for the chapter's IT and web initiatives during the 2026/27 term.

Faculty Coordinator, SEDS Mora Chapter

2025 - 2026

Faculty of Information Technology, University of Moratuwa

- Represented the Faculty of Information Technology and supported coordination of faculty participation in chapter activities.

Web Development Team Member, IEEE WIE

Jul 2025 - Sep 2025

University of Moratuwa

- Contributed to the IEEE WIE University of Moratuwa website using Next.js and Tailwind CSS to present the chapter's mission, events, and achievements.
